Camino Flex Plug and Play Modular Wiring

Service, Support and Reliability

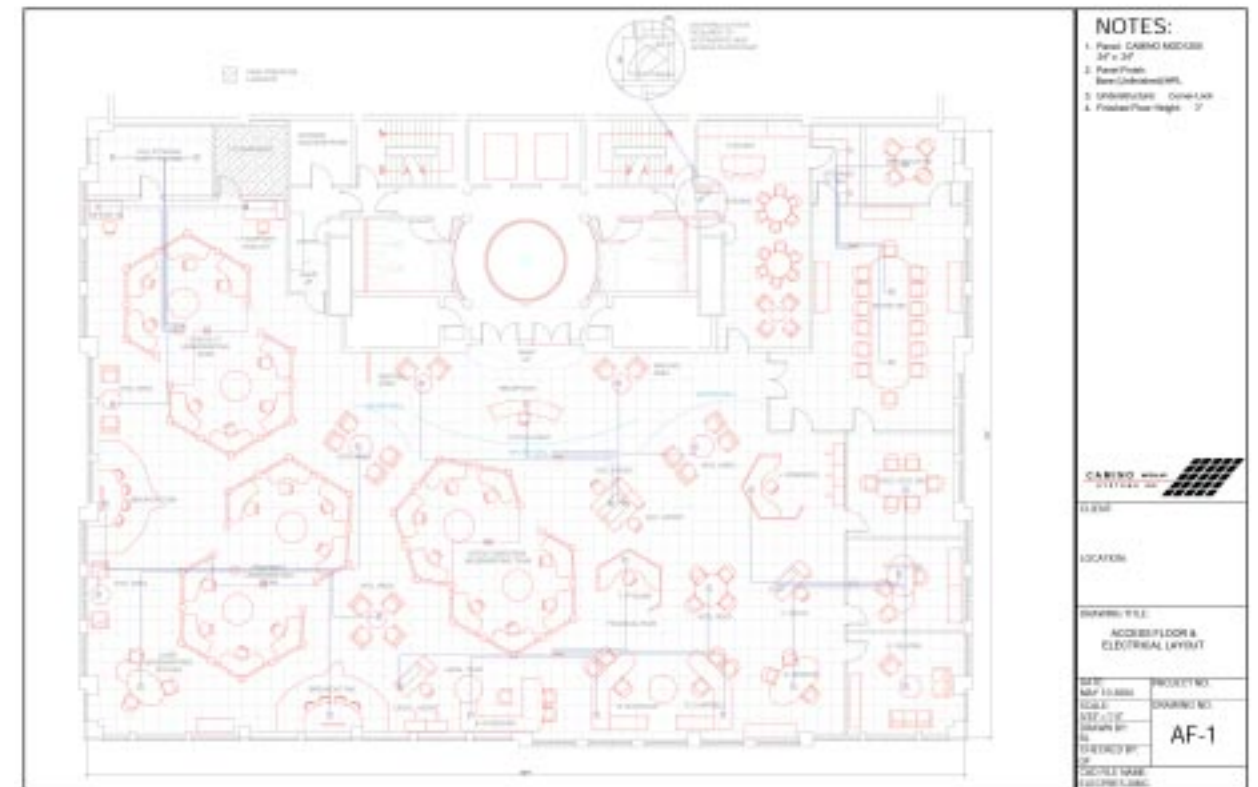

All boxes available in IG and dedicated power configurations

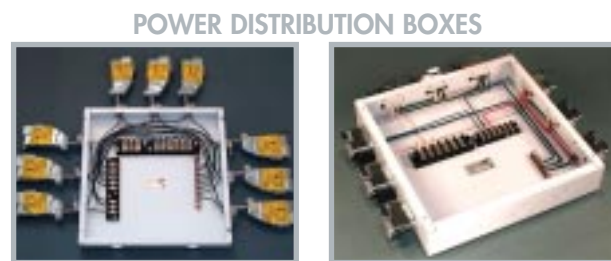

Voice/data plates accommodate all manufacturer's connectors

- Manufacturer of access flooring and electrical products since 1970.
 - In-house electrical, mechanical and structural engineers.
 - In-house CAD department provides detailed shop drawings.
 - Installation services and site supervision available.

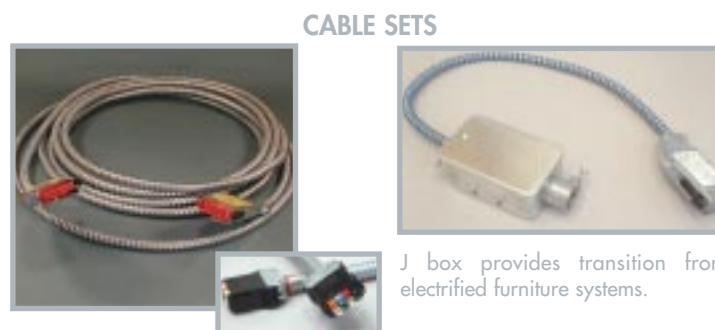

Camino flex plug and play wiring systems are compatible with all types of furniture systems

Low profile design fits in 2 1/2" FFH floor system. Available in 4, 6, 9, or 12 port configurations. Factory pre-wired to suit project circuiting requirement.

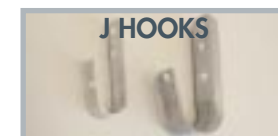

Standard design available in 4, 6, 9, and 12 port configurations. Power out ports are labeled to ensure organized electrical installation.

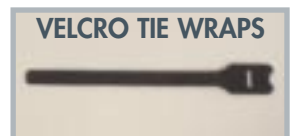

Plug and play cable sets available in 3 to 10 wire configurations and lengths of 10 ft, 15 ft, 20 ft, 25 ft, 35 ft, 50 ft and 75 ft.

J box provides transition from electrified furniture systems.

Cable Management Accessories

Superior Structural Integrity and Cabling Capacity

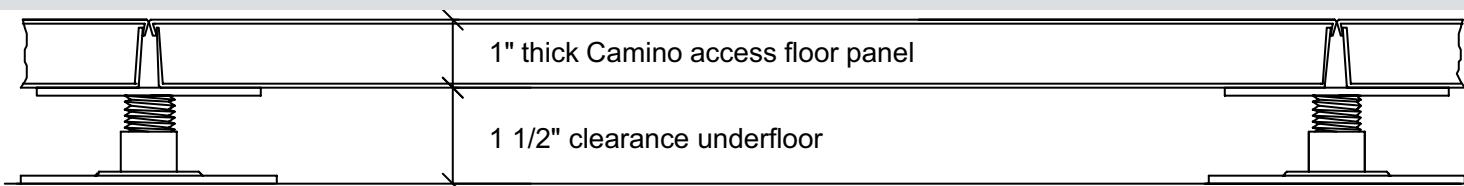

Camino adjustable all-steel pedestal and laser level installation techniques ensure a flat, solid floor system.
24" (600mm) pedestal spacing provides up to 80% more cabling capacity.

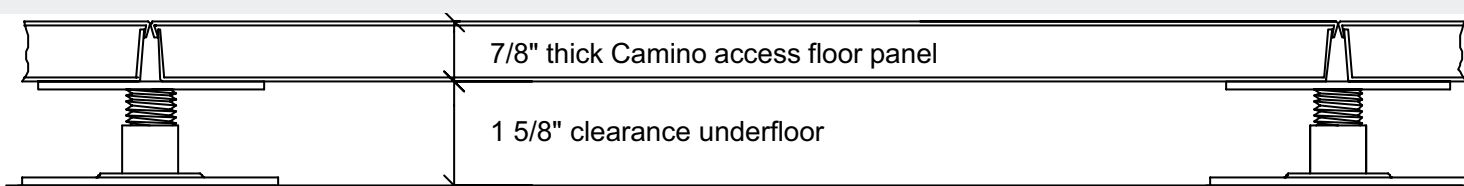

Plastic Cone Type System - NO ADJUSTABILITY creates uneven floors and rocking panels.
Limited raceway space for cable installation.

Superior Underfloor Clearance (2 1/2" Finished Floor Height)

Camino provides up to 57% more clearance than competitive systems to accommodate pipe, crossovers and junction boxes.

Designer Finishes
